

SEAL IN ANY WEATHER!

A simple and effective sealing method: Coltogum Water-Stop achieves a great effect at low cost.

Problem-free repair of leaky spots

Coltogum Water-Stop is a tough, compact, brushable sealing compound. Small holes and cracks are bridged by the reinforcing fibres.

Its permanent elasticity permits the compound to be applied in any weather, even in rain or snow. Coltogum Water-Stop has outstanding adhesion on practically every surface. All these characteristics combine to make Coltogum Water-Stop a perfect product for the repair of leaks and seepage on every part of the roof. It is so easy to use – one coat is sufficient.

Why Coltogum Water-Stop often produces the best sealing results

As a rule, leaky spots do not occur in new buildings; they tend to occur in areas where age has a part to play. Renovation in such cases generally involves very high costs, and the question of the cost/effectiveness ratio soon comes up.

If what you are looking for is perfect results at low cost, then Coltogum Water-Stop offers an outstandingly practical solution at a very attractive price. This brushable sealing compound adheres very strongly to practically any material, which means that it has an exceptionally wide range of applications. It can be used on roofs, gutters, and even on damaged outlets or brickwork.

Coltogum®

WATER STOP

Highly elastic brushable sealing compound.
Seals in any weather.

Coltogum® is a registered trademark of SFS Stadler, Heerbrugg, Switzerland.

Reinforced with fibres

The ready-to-use sealing compound is supplied in original cans in various sizes and is suitable for application by brush. Use straight from the can. Coltogum Water-Stop should not be thinned. Light grey in colour, with a neutral odour.

PROBLEM-FREE REPAIR OF LEAKY SPOTS

Rusted drainpipe: small cracks are bridged thanks to fibres.

Repair gutters permanently, simply by brushing on.

Sheet metal roofs of all kinds: seal leaky areas.

Repair leaky bitumen coatings at minimal cost.

First cover large cracks with reinforcement – then apply Coltogum Water-Stop.

Coltogum Water-Stop can be applied at any time – whatever the weather.

It's so easy!

Repairs with Coltogum Water-Stop need no preparation. Of course, you must remove any dirt from the defective area.

Work in any weather!

Repairs can be made in any weather – even in rain. The outdoor temperature should not be below -10°C or above $+35^{\circ}\text{C}$.

COLTOGUM WATER STOP

- Seals in any weather
- Easy to brush on
- Reinforced with fibres
- High elasticity
- Suitable for any surface on roofs and walls
- Toxicity classification: None

Sealed rapidly – and permanently!

No more water will penetrate where Coltogum Water-Stop has solved a sealing problem. The elastic compound resists the effects of the weather, and even saltwater and alkalis are kept out. The seal is dust-dry after 4 hours –

and Coltogum Water-Stop is fully dry after 3 weeks. Further proof of the exceptionally long life of this perfect sealing system.
